PROFILE

Highly motivated Royal Holloway University, (BA Hons) Computer Science graduate seeking a challenging position to utilise my skills and knowledge in [software development, data analysis, and problem-solving]. Eager to contribute to a dynamic team and gain practical experience in the field of [computer science].

EDUCATION

BSc Computer Science, Royal Holloway, University of London   **2020- 2023**

- *Organised*: coordinated and executed project milestones in an agile development environment, ensuring timely delivery and effective task management.
- *Teamwork*: worked in a team of eight to produce a website for a restaurant, utilising Vue and Spring Boot.
- *Problem solving*: carried out the role of a scrum master, helping my teammates to stay on track when they encountered problems.

Level 4 Psychology, Bournemouth University   **2018- 2019**

- *Research Proficiency*: designed and executed a quantitative research study exploring the correlation between social media usage and anxiety levels among adolescents.
- *Effective Communication*: strong written and verbal communication skills with the ability to present research findings by producing a variety of reports.

St.Joseph's Catholic High School, Slough   **2011-2018**

- **A-levels:** Maths, Psychology, Economics, Polish (Grades A*- C).
- **GCSEs:** 12 at grades A-C including English and Maths.

EXPERIENCE

Hospitality, Appetite4Work   **Aug 2022 – Current**

- *Professional communication:* handled customer queries clearly and calmly under pressure.
- *Attention to Detail:* meticulous approach to tasks, ensuring accuracy in guest orders, reservations, and maintaining a clean and welcoming environment.
- *Adaptability*: well-versed in managing fast-paced, dynamic environments, adapting swiftly to changing circumstances while maintaining high levels of service quality.

ACADEMIC PROJECTS

Final Year Project – Web Development, E-commerce website   **Sept 2022 – May 2023**

- Created a working e-commerce website with JavaScript/React and CSS that allows users to browse through a catalogue of products, login, and go through a purchase process.
- Alongside this built and maintained a database (with PostgreSQL) used for storing information about users, products, and transactions.

Software Engineering – Calculator application   **Sept 2021 – Jan 2022**

- Developed a calculator application with Java whilst following a Test Driven Development approach.
- The application was written by implementing Object Oriented Programming, separating aspects of the app into classes/objcets and making use of concepts like polymorphism.

Game Development – brick-breaker game   **Jan 2021 – May 2021**

- Completed a "brick-breaker" style game using Python as part of a group project.
- Utilised knowledge of game physics like velocity, acceleration, and collisions which helped in designing the ball's movement, bouncing off walls, and hitting the bricks accurately.

TECHNICAL SKILLS

- *Programming skills*: Java, Python, JavaScript, CSS.
- *Database Management*: proficient in creating, maintaining, and querying databases using PostgreSQL for various projects.
- *REST APIs*: developed and integrated RESTful APIs for communication between front-end and back-end systems.
- *Version Control***:** Git, SVN
